Introduction

This document aims to provide a description of the Web-Based School Concern and Feedback Reporting System project's entire design and development process. It offers a thorough explanation of the structure, characteristics, and general functionality of the system. This study also highlights the current project status, design elements, and general system structure.

1.1. Purpose

The purpose of this document is to provide a thorough explanation of the Web-Based School Concern and Feedback Reporting System project's design. This document shows how the system is organized to satisfy the requirements specified in the Software Requirements Specification (SRS) and to comply with IEEE standards. Additionally, this report attempts to convert the specified software requirements into an understandable description of the interfaces, data, and system components that will be used in the implementation stage. The SRS and Software Design Document (SDD) will be updated in accordance with any changes that may arise throughout development; nevertheless, as software design is susceptible to ongoing enhancements and revisions.

1.2. Scope

This document explains the Web-Based School Concern and Feedback Reporting System, covering its key features such as concern submission, categorization, user authentication, and administrator response management. The database design, interface structure, and system architecture are also covered. UML diagrams are used to show system interactions and processes, giving users a clear idea of how the system works. As changes arise during implementation, the document may be updated to reflect the current state of development.

1.3. Definitions and Acronyms

Table 1. Acronyms and Definitions

Acronym	Definition
ERD	Entity-Relationship Diagram
SRS	Software Requirement Specifications
SDD	Software Design Descriptions
UML	Unified Modelling Language
WSCFRS	Web-Based School Concern and Feedback Reporting System

Decomposition description

This section breaks down the Web-Based School Concern and Feedback Reporting System into primary modules, processes, and data components. It describes the structure of the system, including functions such administrative response handling, categorization, concern submission, and user administration. The accompanying diagrams provide a clear overview of the system's general structure by illustrating the interactions between different components as well as the data flow within the system.

3.1. Module Decomposition

The ConcernTrack project is composed of three main modules namely Admin, Student and Concern modules; each of which are decomposed as follows:

3.1.1. Admin Module

Identification	wscfrs/admin/login.php
Type	Form
Purpose	Allows the admin to securely log in to access the system

Identification	wscfrs/admin/dashboard.php
Type	Page
Purpose	Displays the summary of reports, including total, pending, and resolved concerns.

Identification	wscfrs/admin/manage_concerns.php
Type	Page
Purpose	Enables the admin to view, filter, and manage all submitted concerns.

Identification	wscfrs/admin/reply_concern.php
Type	Form
Purpose	Allows the admin to respond to students' concerns and provide feedback.

Identification	wscfrs/admin/update_concern_status.php
----------------	--

Capstone Project*ConcernTrack:**A Web-Based School Concern and Feedback Reporting System*

Type	Process
Purpose	Updates concern status such as Pending, In Progress, or Resolved.

3.1.2. Student Module

Identification	wscfrs/student/login.php
Type	Form
Purpose	Allow students to log in and access the system

Identification	wscfrs/student/report_concern.php
Type	Form
Purpose	Allows students to submit concerns with a category and description.

Identification	wscfrs/student/my_reports.php
Type	Page
Purpose	Displays all concerns submitted by the student and their current status.

3.1.3. System Module

Identification	wscfrs/system/category_handler.php
Type	Process
Purpose	Assigns categories such as Academic, Facility, Bullying, or Scheduling.

Identification	wscfrs/system/notification_handler.php
Type	Process
Purpose	Send status updates and admin responses to students.

3.2. Concurrent process description

The system's concurrent processes and component interactions are depicted in the class diagrams. These are shown with appropriate labels in the following illustrations.

3.2.1. Login

3.3. Data decomposition

3.3.1. Data entity: Admin Info

```
--  
-- Table structure for table 'admin_info' --  
--  
CREATE TABLE 'admin_info' (  
    'admin_id' int(11) NOT NULL auto_increment,  
    'firstname' varchar (50) NOT NULL,  
    'middlename' varchar (50) NOT NULL,  
    'lastname' varchar (50) NOT NULL,  
    'username' varchar (50) NOT NULL,  
    'password' varchar (50) NOT NULL,  
    'position' varchar (50) NOT NULL,  
    'account_status' varchar (20) NOT NULL,  
    PRIMARY KEY ('admin_id'),  
);
```

trainmeapp.admin_info

admin_id	: int(11)
firstname	: varchar(50)
middlename	: varchar(50)
lastname	: varchar(50)
username	: varchar(50)
password	: varchar(50)
position	: varchar(50)
account_status	: varchar(20)

3.3.2. Data entity: Student Info

```
--  
-- Table structure for table  
'student_info' --  
--  
CREATE TABLE student_info' (  
    'student_id' int(11) NOT NULL  
    auto_increment,  
    'student_num' varchar (50) NOT  
    NULL,  
    'firstname' varchar (50) NOT NULL,  
    'lastname' varchar (50) NOT NULL,  
    'course' varchar (50) NOT NULL,  
    'year_level' varchar (50) NOT  
    NULL,  
    'email' varchar (50) NOT NULL,
```

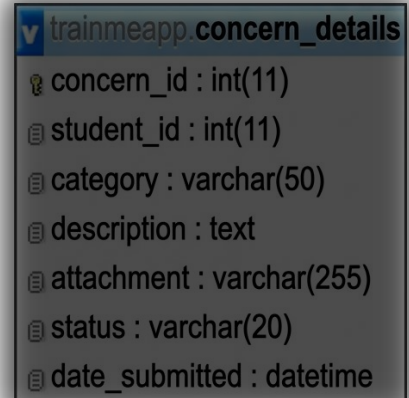

trainmeapp.student_info

student_id	: int(11)
student_num	: varchar(20)
firstname	: varchar(50)
lastname	: varchar(50)
course	: varchar(100)
year_level	: int(2)
email	: varchar(100)

```
`PRIMARY KEY ('student_id'),  
);
```

3.3.3. Data entity: Concern Details

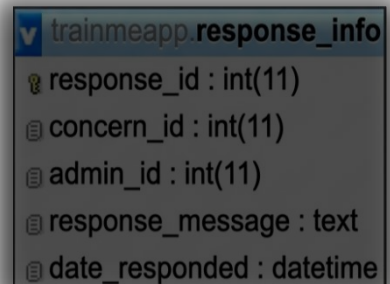

```
--  
-- Table structure for table 'concern_details' --  
--  
CREATE TABLE 'concern_details' (  
    'concern_id' int(11) NOT NULL  
    auto_increment,  
    'student_id' varchar (50) NOT NULL,  
    'category' varchar (50) NOT  
    NULL,  
    'description' text NOT NULL  
    'attachment' varchar (255),  
    'status' varchar (20) NOT NULL,  
    'date_submitted' datetime NOT  
    NULL  
  
    PRIMARY KEY ('concern_id'),  
);
```

trainmeapp.concern_details	
🔑	concern_id : int(11)
📄	student_id : int(11)
📄	category : varchar(50)
📄	description : text
📄	attachment : varchar(255)
📄	status : varchar(20)
📄	date_submitted : datetime

3.3.4. Data entity: Response Info

```
--  
-- Table structure for table 'response_info' --  
--  
CREATE TABLE 'response_info' (  
    'response_id' int(11) NOT NULL  
    auto_increment,  
    'concern_id' int (11) NOT NULL,  
    'admin_id' int(11) NOT NULL,  
    'response_message' text NOT NULL,  
    PRIMARY KEY ('response_id'),  
);
```

trainmeapp.response_info	
🔑	response_id : int(11)
📄	concern_id : int(11)
📄	admin_id : int(11)
📄	response_message : text
📄	date_responded : datetime

3.4 Entity-Relationship Diagram

Interface description

The Web-Based School Concern and Feedback Reporting System is a simple and user-friendly graphical interface that enables students and administrators to submit and manage concerns, update progress reports, categorize issues, and send notifications. It also contains options for viewing, organizing, and printing reports to ensure effective monitoring and tracking of all submitted concerns.

5.1. Module Interface

5.1.1. Admin Module

The Admin Module is intended for authorized administrators who maintain and monitor the system. It provides access to Home, Student Records, Concerns, Categories, Responses, Notifications, Settings, Profiles, and Reports, allowing for convenient management of all system data and operations.

5.1.1.1 The Admin Log-in Interface

The Admin Log-in Interface allows authorized users to access the system by entering a valid username and password. Upon successful login, a confirmation message appears, and the user is directed to the Admin Homepage.

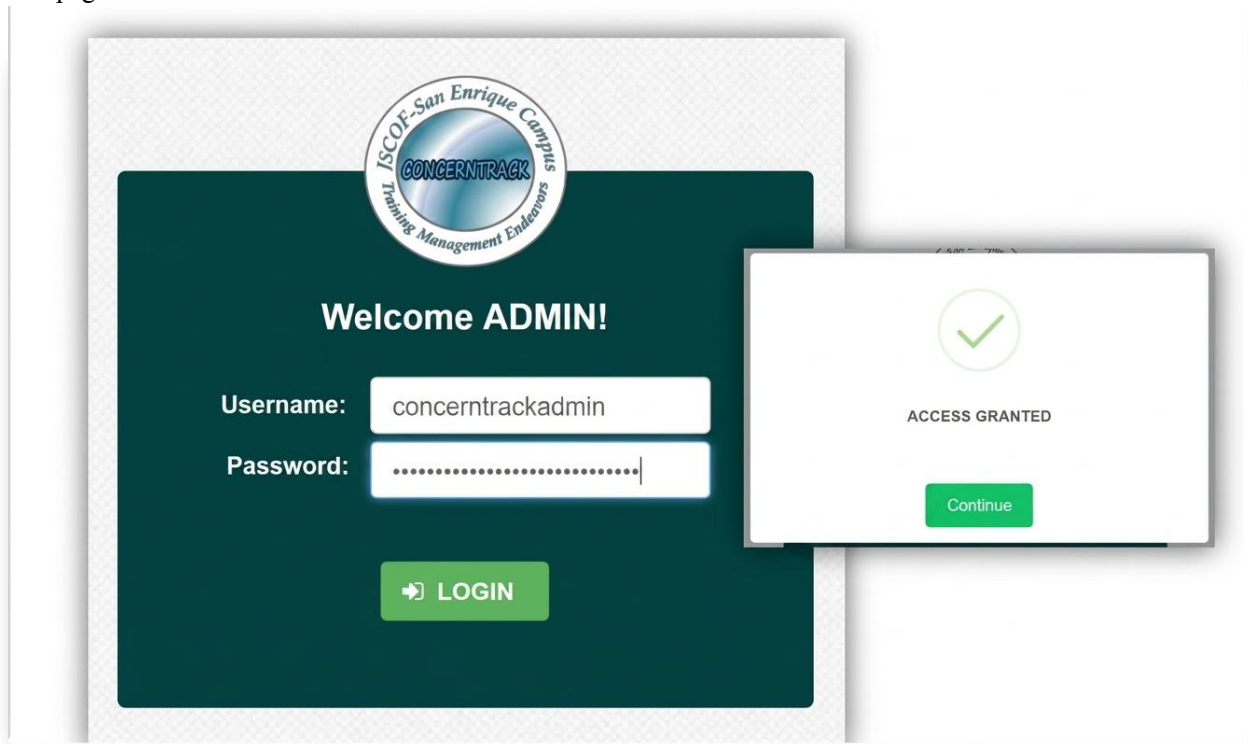

Figure 15. Admin Login Form

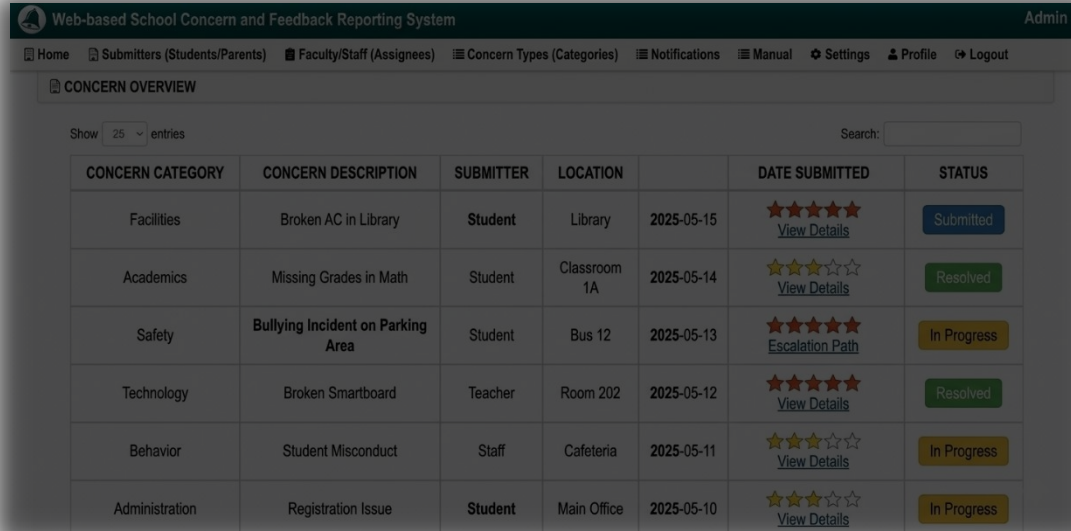

Capstone Project

ConcernTrack:

A Web-Based School Concern and Feedback Reporting System

5.1.1.2 Dashboard/Home Page

As reflected in Figure 29, the Admin Home Page contains *Home, Clients, Trainers, Training Needs, Notifications, Reports, Settings, and Profile* navigation menus. It displays the scheduled training programs with status as to *pending, ongoing, conducted, terminated*. A rating for each terminated program is also revealed.

The screenshot shows the Admin Dashboard of the 'Web-based School Concern and Feedback Reporting System'. The top navigation bar includes links for Home, Submitters (Students/Parents), Faculty/Staff (Assignees), Concern Types (Categories), Notifications, Manual, Settings, Profile, and Logout. The main section is titled 'CONCERN OVERVIEW' and features a table with columns for Concern Category, Concern Description, Submitter, Location, Date Submitted, and Status. The table lists six concerns, each with a star rating and a 'View Details' link. The status of each concern is indicated by a colored button: Submitted (blue), Resolved (green), In Progress (yellow), and Escalation Path (orange).

CONCERN CATEGORY	CONCERN DESCRIPTION	SUBMITTER	LOCATION	DATE SUBMITTED	STATUS
Facilities	Broken AC in Library	Student	Library	2025-05-15	Submitted
Academics	Missing Grades in Math	Student	Classroom 1A	2025-05-14	Resolved
Safety	Bullying Incident on Parking Area	Student	Bus 12	2025-05-13	In Progress
Technology	Broken Smartboard	Teacher	Room 202	2025-05-12	Resolved
Behavior	Student Misconduct	Staff	Cafeteria	2025-05-11	In Progress
Administration	Registration Issue	Student	Main Office	2025-05-10	In Progress

Figure 16. Admin Dashboard Page

5.1.1.3 Update Concern

This page allows the administrator to update the status of concerns. It helps monitor progress and keep students informed.

UPDATE CONCERN STATUS & DETAILS

Submitter: Student (Maria Santos) Category: Technology (Projector issue) Date Submitted: 2026-05-15
Location: Classroom 202 Current Status: IN PROGRESS

1. Concern Details

Detailed Description (original):
The projector in Classroom 202 (Science Lab) has a very dim image and occasionally shuts down unexpectedly. It makes a high-pitched whine. Multiple teachers and students have reported this problem. Affecting lessons.

Admin/Maintenance Progress Notes:
Tech team initial check 05-16. Bulb may be old. Bulb ordered.
Replacement arrival ETA 05-18.
Further diagnostics needed for whining notes.

Progress Log:

Date	User	Action
2026-05-16	Maria S.	Concern submitted.
2026-05-16	**Admin**	Review in progress. Status set to In Progress.
2026-05-16	**Admin**	Notified Tech Support.
2026-05-17	Tech Support	Inspected projector. Order placed for new bulb.

2. Update Status

CURRENT STATUS & UPDATE
IN PROGRESS

"Update to:"
[SUBMITTED] [IN PROGRESS] [RESOLVED]

Submit Status Update Print Concern Report

Figure 17. Update Concern Page

5.1.1.4 View Concern Status

The Re-schedule Training form allows the user to set new schedule for a cancelled training program. This is shown in Figure 32.

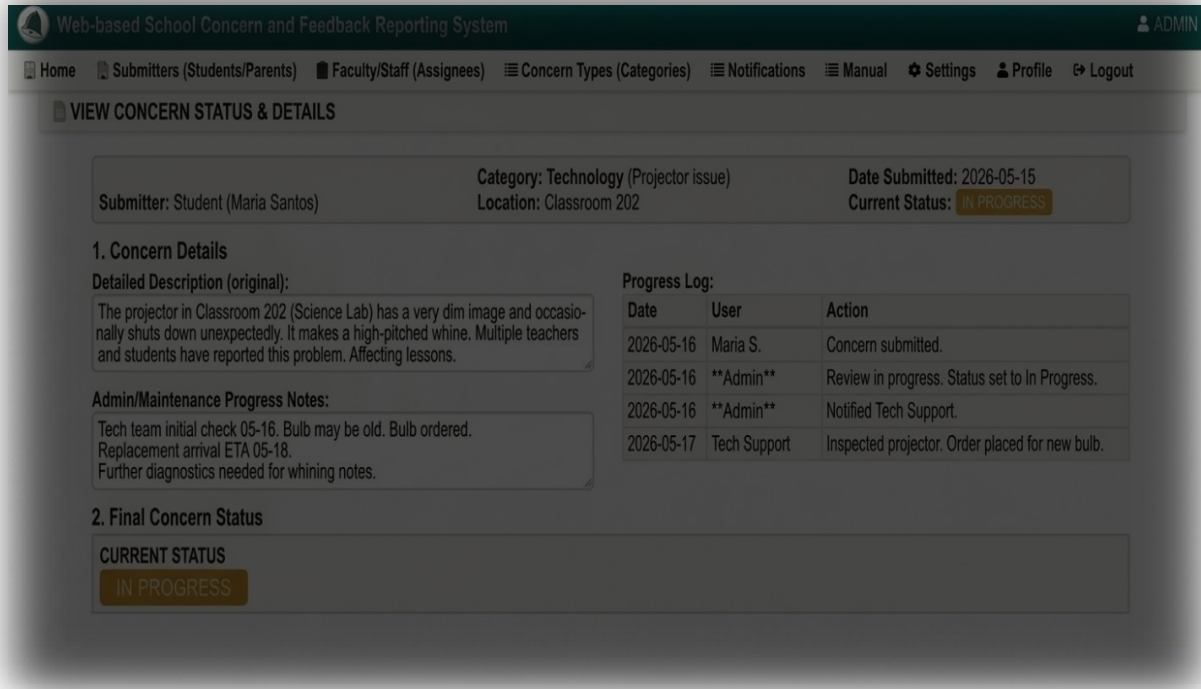

Figure 18. View Concern Status Page

5.1.1.5 *Most Reported Concerns*

This page, as reflected in Figure XX, displays the most frequently reported concerns submitted by students. It helps administrators identify common issues and prioritize actions to address recurring problems within the school.

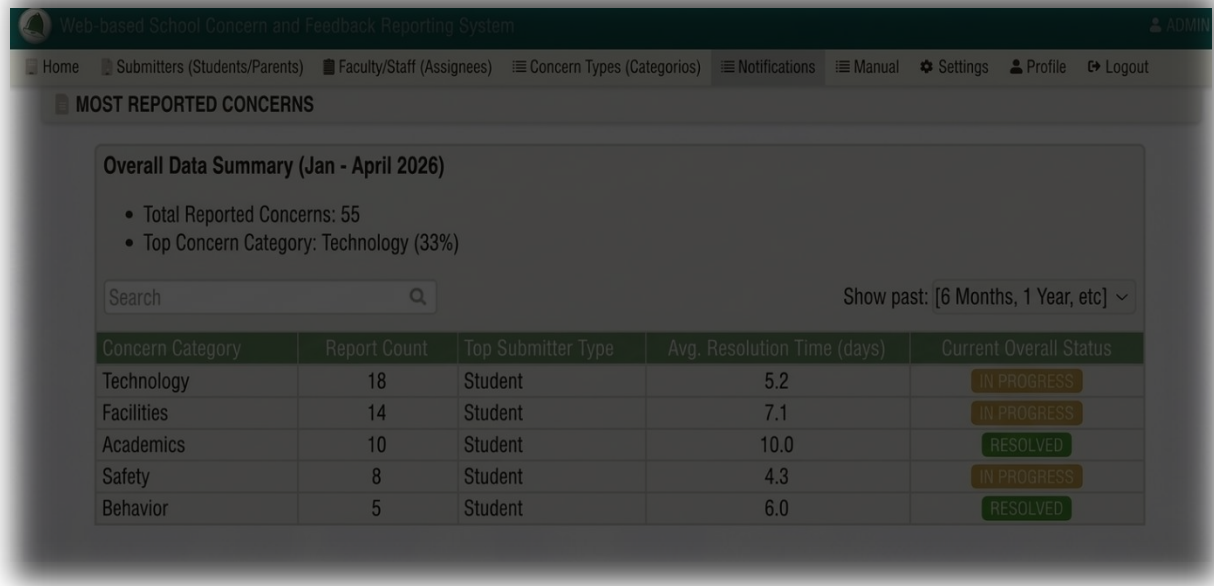

Figure 19. Most Reported Concerns Page

5.1.2 Student Module

The Student Module allows students to submit, view, and track their concerns. It includes features such as Home, Submit Concern, Notifications, Profile, and Status Tracking.

5.1.2.1 The Student Login Interface

The Student Log-in Interface, as reflected in Figure XX, allows students to access the system by entering their registered username and password. Upon successful login, a confirmation message is displayed, and the user is redirected to the Student Homepage where they can submit and monitor their concerns.

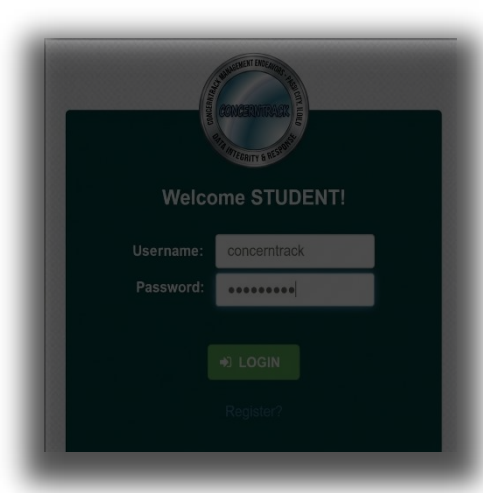

Figure 20. Client Login Interface

5.1.2.2 Students' Dashboard

The *Client Home Page* as reflected in Figure 52 contains an infomercial on the training programs offered by the college.

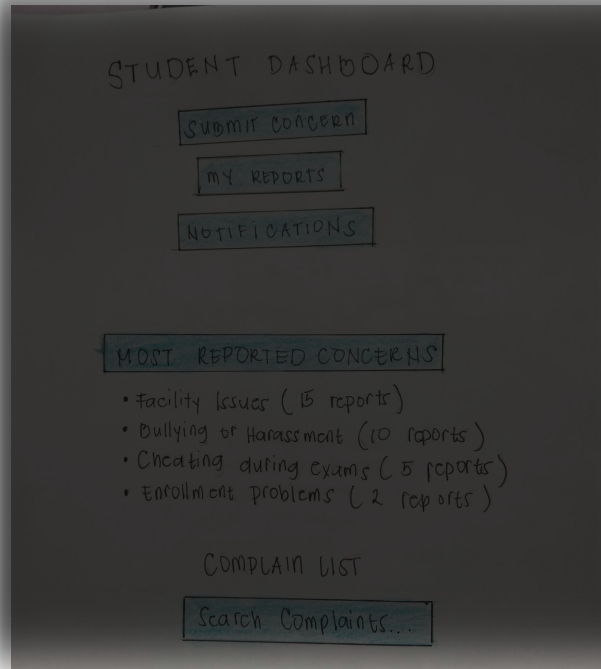

Figure 21. Student Dashboard

5.1.2.3 *Submit Concern Page*

This page, as reflected in Figure 53, allows students to submit their concerns by providing necessary details such as category, description, and other relevant information. It ensures that all concerns are properly recorded and forwarded to the administrator for review and action.
